Coastal Flooding continues through Sunday; Periods of Hazardous Beach Conditions, Rain, and Gusty Winds Next Week

KEY POINTS

- **Moderate coastal flooding continues into the weekend**
- **Unsettled weather returns Sunday into Monday with light to moderate rain and gusty winds expected**
- **Additional rain and gusty winds return Tuesday through early Wednesday**

WEATHER RISK OUTLOOK

Risk levels incorporate potential impacts from weather hazards and likelihood of occurrence for a reasonable worst-case scenario.

DETAILS

North Bay	
Coastal Flooding	**Impacts:** • High tides will result in flooding of low-lying infrastructure, numerous road closures, and coastal erosion • Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas **Timing:** • Coastal Flood Advisory through 5 PM Sunday for bayshore locations along the San Francisco and San Pablo Bays • Coastal Flood Advisory through 4 PM Saturday for the Pacific Coast **Confidence:** High
	Details: At the San Francisco tidal gauge, high tide is expected to be: • 1.6 ft above normal (7.5 ft MLLW) at 1:28 PM Saturday 11/28 • 0.9 ft above normal (6.8 ft MLLW) at 2:32 PM Sunday 11/29 These predictions include up to 1.3 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Rain	**Impacts:** • Beneficial rain Sunday into Monday and again Tuesday **Timing:** • Light to moderate rain Sunday into Monday with between 0.75-1.5" expected •Light rain likely Tuesday with 0.00-0.25" expected **Confidence:** Moderate
Wind	**Impacts:** • Winds will blow around unsecured objects • Tree limbs could be blown down and a few power outages may result • The combination of wind and moist soils will increase the risk for downed trees **Timing:** Sunday, then again on Tuesday and Wednesday **Confidence:** Moderate
	Details: • Wind gusts of 30-40 mph Sunday and Tuesday. • Potential for occasionally stronger gusts directly along the coastline and across the higher elevations on Tuesday • Moderate offshore wind gusts of 35 to 45 mph possible Tuesday night into Wednesday across the interior North Bay Mountains. • Stronger gusts up to 50 mph possible across the highest ridgelines of the Vaca Mountains Tuesday Night into Wednesday
Thunderstorms	**Impacts:** • Thunderstorms may produce gusty winds, heavy rain, and graupel **Timing:** Late Sunday Morning through Sunday Evening **Confidence:** Low to Moderate
	Details: • Low chance (10-20%) for scattered thunderstorms during the day on Wednesday
Beach Hazards	**Impacts:** Large breaking waves can overpower swimmers, pulling people into the sea from beaches, jetties, and rocks resulting in significant physical injury and increasing the risk of drowning **Timing:** • Additional periods of hazardous beach conditions are likely next week as the storm door remains open

	Confidence: Moderate
	Details: • Increased risk of sneaker waves and strong rip currents as additional systems move along the California Coast this week • Breaking waves between 15 to 19 ft with favored breakpoints potentially seeing breaking waves to around 20-21 ft

San Francisco	
Coastal Flooding	**Impacts:** • High tides will result in flooding of low-lying infrastructure, numerous road closures, and coastal erosion • Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas **Timing:** Coastal Flood Advisory through 5 PM Sunday **Confidence:** High
	Details: At the San Francisco tidal gauge, high tide is expected to be: • 1.6 ft above normal (7.5 ft MLLW) at 1:28 PM Saturday 11/28 • 0.9 ft above normal (6.8 ft MLLW) at 2:32 PM Sunday 11/29 These predictions include up to 1.3 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Rain	**Impacts:** • Beneficial rain Sunday into Monday and again on Tuesday **Timing:** • Light to moderate rain Sunday into Monday with up to 0.5" expected • Light rain likely on Tuesday with to around 0.10" expected **Confidence:** Moderate
Wind	**Impacts:** • Winds will blow around unsecured objects • Tree limbs could be blown down and a few power outages may result • The combination of wind and moist soils will increase the risk for downed trees **Timing:** Sunday, then again on Tuesday **Confidence:** Moderate
	Details: • Wind gusts of 30-40 mph Sunday and again on Tuesday. Gusty winds may continue into very early Wednesday morning. • Potential for occasionally stronger gusts directly along the coastline and across the higher elevations on Tuesday
Beach Hazards	**Impacts:** Large breaking waves can overpower swimmers, pulling people into the sea from beaches, jetties, and rocks resulting in significant physical injury and increasing the risk of drowning **Timing:** • Additional periods of hazardous beach conditions are likely next week as the storm door remains open. **Confidence:** Moderate
	Details: • Increased risk of sneaker waves and strong rip currents as additional systems move along the California Coast this week • Breaking waves between 15 to 19 ft with favored breakpoints potentially seeing breaking waves to around 20-21 ft

SF Peninsula	
Coastal Flooding	**Impacts:** • High tides will result in flooding of low-lying infrastructure, numerous road closures, and coastal erosion • Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas **Timing:** • Coastal Flood Advisory through 5 PM Sunday for bayshore locations along the San Francisco Bay • Coastal Flood Advisory through 4 PM Saturday for the Pacific Coast **Confidence:** High
	Details: At the San Francisco tidal gauge, high tide is expected to be: • 1.6 ft above normal (7.5 ft MLLW) at 1:28 PM Saturday 11/28 • 0.9 ft above normal (6.8 ft MLLW) at 2:32 PM Sunday 11/29 These predictions include up to 1.3 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Rain	**Impacts:** • Beneficial rain Sunday into Monday and again on Tuesday **Timing:** • Light to moderate rain Sunday into Monday with up to 0.5" expected • Light rain Tuesday with up to 0.25" expected **Confidence:** Moderate
Wind	**Impacts:** • Winds will blow around unsecured objects • Tree limbs could be blown down and a few power outages may result • The combination of wind and moist soils will increase the risk for downed trees **Timing:** Sunday, then again on Tuesday **Confidence:** Moderate
	Details: • Wind gusts of 30-40 mph Sunday and again on Tuesday. Gusty winds may continue into very early Wednesday morning. • Potential for occasionally stronger gusts directly along the coastline and across the higher elevations on Tuesday
Beach Hazards	**Impacts:** Large breaking waves can overpower swimmers, pulling people into the sea from beaches, jetties, and rocks resulting in significant physical injury and increasing the risk of drowning **Timing:** • Additional periods of hazardous beach conditions are likely this weekend into next week **Confidence:** Moderate
	Details: • Increased risk of sneaker waves and strong rip currents as additional systems move along the California Coast this week • Breaking waves between 15 to 19 ft with favored breakpoints potentially seeing breaking waves to around 20-21 ft

East Bay	
Coastal Flooding	**Impacts:** • High tides will result in flooding of low-lying infrastructure, numerous road closures, and coastal erosion • Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas **Timing:** Coastal Flood Advisory through 5 PM Sunday for bayshore locations along the San Francisco Bay **Confidence:** High
	Details: At the San Francisco tidal gauge, high tide is expected to be: • 1.6 ft above normal (7.5 ft MLLW) at 1:28 PM Saturday 11/28 • 0.9 ft above normal (6.8 ft MLLW) at 2:32 PM Sunday 11/29 These predictions include up to 1.3 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Wind	**Impacts:** • Strong winds may produce difficult driving conditions for high profile vehicles • Winds will blow around unsecured objects • Tree limbs could be blown down and a few power outages may result • The combination of wind and moist soils will increase the risk for downed trees **Timing:** Sunday, then again on Tuesday through early Wednesday **Confidence:** Moderate
	Details: •Widespread wind gusts of 30-40 mph Sunday and Tuesday • Strong offshore winds with gusts peaking between 40-60 mph through favored gaps and passes, and at the ridgelines Tuesday Night into Wednesday
Rain	**Impacts:** • Beneficial rain Sunday into Monday and again on Tuesday **Timing:** • Light to moderate rain Sunday into Monday with between 0.25-0.5" expected • Light rain Tuesday up to 0.10" expected **Confidence:** Moderate

South Bay	
Coastal Flooding	**Impacts:** • High tides will result in flooding of low-lying infrastructure, numerous road closures, and coastal erosion • Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas **Timing:** Coastal Flood Advisory through 5 PM Sunday for bayshore locations along the San Francisco Bay **Confidence:** High
	Details: At the San Francisco tidal gauge, high tide is expected to be: • 1.6 ft above normal (7.5 ft MLLW) at 1:28 PM Saturday 11/28 • 0.9 ft above normal (6.8 ft MLLW) at 2:32 PM Sunday 11/29 These predictions include up to 1.3 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Rain	**Impacts:** • Beneficial rain Sunday into Monday and again Tuesday **Timing:** • Light to moderate rain Sunday into Monday and again Tuesday • Up to 0.25" Sunday into Monday across the lower elevations. Between 0.25-0.5" across the higher elevations Sunday into Monday • Up to 0.25" Tuesday across the Lower elevations and between 0.25-0.5" across the higher elevations and southern Santa Clara Valley. **Confidence:** Moderate
Wind	**Impacts:** • Winds will blow around unsecured objects • Tree limbs could be blown down and a few power outages may result • The combination of wind and moist soils will increase the risk for downed trees **Timing:** Sunday, then again on Tuesday **Confidence:** Moderate
	Details: • Wind gusts of 25-35 mph Sunday and Tuesday. Gusty winds may continue into very early Wednesday morning.

Santa Cruz County	
Coastal Flooding	**Impacts:** • High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion • Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas **Timing:** Coastal Flood Advisory through 4 PM Saturday for the Pacific Coast **Confidence:** High
	Details: At the Monterey tidal gauge, high tide is expected to be: • 1.6 ft above normal (7.0 ft MLLW) at 12:14 PM Saturday 11/28 • 1.0 ft above normal (6.3 ft MLLW) at 1:20 PM Sunday 11/29 These predictions include up to 1.3 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Rain	**Impacts:** • Beneficial rain Sunday into Monday and again Tuesday **Timing:** • Light to moderate rain Sunday into Monday with 0.5-0.75" expected • Light to moderate rain Tuesday with around 0.25-0.5" expected **Confidence:** Moderate
Wind	**Impacts:** • Winds will blow around unsecured objects • Tree limbs could be blown down and a few power outages may result • The combination of wind and moist soils will increase the risk for downed trees **Timing:** Sunday, then again on Tuesday **Confidence:** Moderate
	Details: • Wind gusts of 30-40 mph Sunday and again on Tuesday. Gusty winds may continue into very early Wednesday morning. • Potential for occasionally stronger gusts directly along the coastline and across the higher elevations on Tuesday
Beach Hazards	**Impacts:** Large breaking waves can overpower swimmers, pulling people into the sea from beaches, jetties, and rocks resulting in significant physical injury and increasing the risk of drowning **Timing:** • Additional periods of hazardous beach conditions are likely this weekend into next week **Confidence:** Moderate
	Details: • Increased risk of sneaker waves and strong rip currents as additional systems move along the California Coast this week • Breaking waves between 15 to 19 ft with favored breakpoints potentially seeing breaking waves to around 20-21 ft

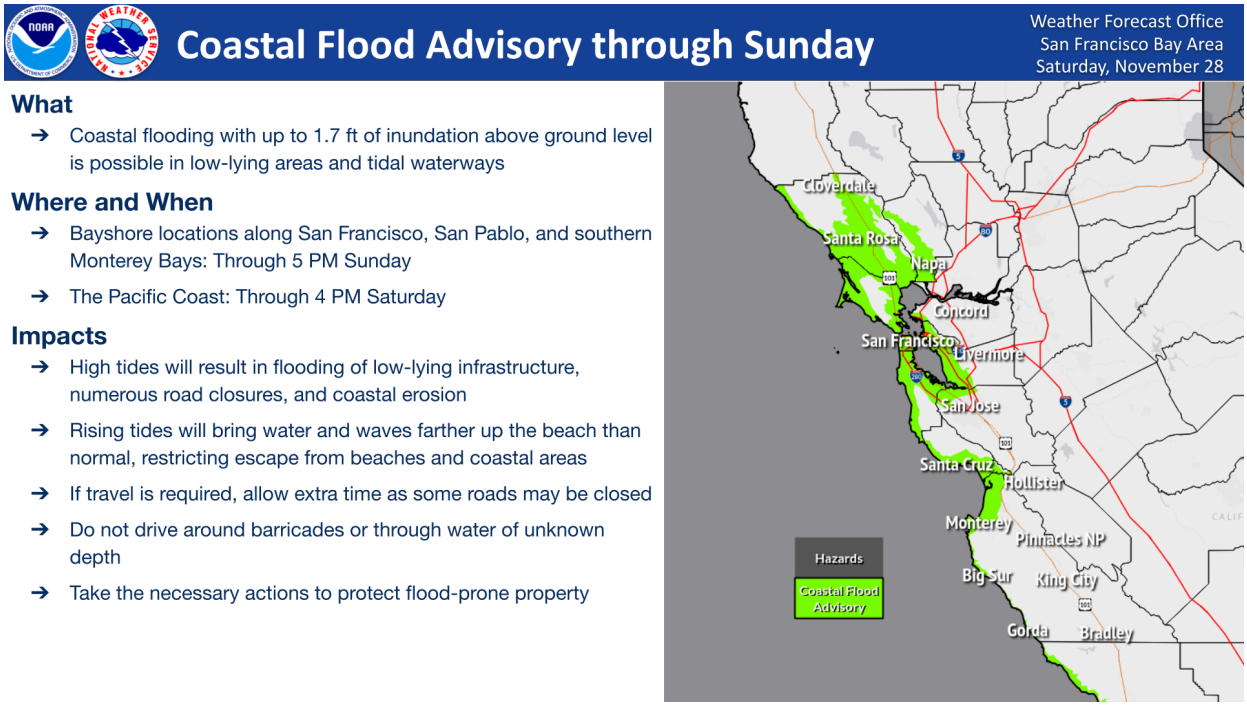

Monterey & San Benito County	
Coastal Flooding	**Impacts:** • High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion • Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas **Timing:** Coastal Flood Advisory through 5 PM Sunday **Confidence:** High
	Details: At the Monterey tidal gauge, high tide is expected to be: • 1.6 ft above normal (7.0 ft MLLW) at 12:14 PM Saturday 11/28 • 1.0 ft above normal (6.3 ft MLLW) at 1:20 PM Sunday 11/29 These predictions include up to 1.3 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Rain	**Impacts:** • Beneficial rain Sunday into Monday • More substantial rain possible Tuesday **Timing:** • Light to moderate rain Sunday into Monday with around 0.25" along the coast and up to 1.00" across the Santa Lucia Range • Light to moderate rain Tuesday across Monterey/San Benito with between 0.5-1.00" expected **Confidence:** Moderate
Wind	**Impacts:** • Winds will blow around unsecured objects • Tree limbs could be blown down and a few power outages may result • The combination of wind and moist soils will increase the risk for downed trees **Timing:** Sunday, then again on Tuesday **Confidence:** Moderate
	Details: • Wind gusts of 30-40 mph Sunday and again on Tuesday. Gusty winds may continue into very early Wednesday morning. • Potential for occasionally stronger gusts directly along the coastline and across the higher elevations on Tuesday.
Beach Hazards	**Impacts:** Large breaking waves can overpower swimmers, pulling people into the sea from beaches, jetties, and rocks resulting in significant physical injury and increasing the risk of drowning **Timing:** • Additional periods of hazardous beach conditions are likely next week as the storm door remains open **Confidence:** Moderate
	Details: • Increased risk of sneaker waves and strong rip currents as additional systems move along the California Coast this week • Breaking waves between 15 to 19 ft with favored breakpoints potentially seeing breaking waves to around 20-21 ft
