San Francisco Bay Area
Monday, Nov 9, 2026

Coastal Flooding and Beach Hazards continue. Pattern change by late week.

KEY POINTS

- **Slightly warmer and dry weather through the middle of the upcoming week**
- **Coastal flooding due to high tides through Friday (11/13)**
- **Hazardous beach conditions through Monday. Second round expected Thursday.**
- **Unsettled weather returns by late week**

WEATHER RISK OUTLOOK

Risk levels incorporate potential impacts from weather hazards and likelihood of occurrence for a reasonable worst-case scenario.

DETAILS

North Bay	
Beach Hazards	**Impacts:** Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** ***First round:*** Through Monday. ***Second round:*** Thursday through Friday **Confidence:** Moderate
	Details: • Beach Hazards Statement in effect through 10 PM Monday • ***First round:*** Long period (14-18 second) west/northwesterly swell will bring an increased risk for sneaker waves and strong rip currents with breaking waves of 12 to 16 feet • ***Second round:*** Long period (14-16 second) west/northwesterly swell will bring an increased risk for sneaker waves and strong rip currents with breaking waves up to 20 feet
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Through Friday (11/13) **Confidence:** High
	Details: At the San Francisco tide gauge, high tide is expected to be: • 1.5 ft above normal (7.3 ft MLLW) at 10:35 AM Monday 11/9 • 1.5 ft above normal (7.3 ft MLLW) at 11:04 AM Tuesday 11/10 • 1.4 ft above normal (7.2 ft MLLW) at 11:35 AM Wednesday 11/11 • 1.3 ft above normal (7.1 ft MLLW) at 12:10 PM Thursday 11/12 • 1.1 ft above normal (6.9 ft MLLW) at 12:49 PM Friday 11/13 These predictions include up to 1.4 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
High Surf	**Impacts:** Large breaking waves up to 25 feet. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** Saturday through Monday (Next Weekend) **Confidence:** Moderate
	Details: • Long period (14-16 seconds) west/northwesterly swell will result in dangerous surf conditions and localized beach erosion, especially at high tide • Inexperienced swimmers and boaters should stay out of the water • Increased risk for sneaker waves and strong rip currents with these large breakers
Rain	**Impacts:** Scattered light rain arrives Thursday through Friday. Moderate rain expected by Saturday. **Timing:** Thursday into the weekend **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

San Francisco	
Beach Hazards	**Impacts:** Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks **Timing:** ***First round:*** Through Monday. ***Second round:*** Thursday through Friday **Confidence:** Moderate
	Details: • Beach Hazards Statement in effect through 10 PM Monday • ***First round:*** Long period (14-18 second) west/northwesterly swell will bring an increased risk for sneaker waves and strong rip currents with breaking waves of 12 to 16 feet • ***Second round:*** Long period (14-16 second) west/northwesterly swell will bring an increased risk for sneaker waves and strong rip currents with breaking waves up to 20 feet
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Through Friday 11/13 **Confidence:** High
	Details: At the San Francisco tide gauge, high tide is expected to be: • 1.5 ft above normal (7.3 ft MLLW) at 10:35 AM Monday 11/9 • 1.5 ft above normal (7.3 ft MLLW) at 11:04 AM Tuesday 11/10 • 1.4 ft above normal (7.2 ft MLLW) at 11:35 AM Wednesday 11/11 • 1.3 ft above normal (7.1 ft MLLW) at 12:10 PM Thursday 11/12 • 1.1 ft above normal (6.9 ft MLLW) at 12:49 PM Friday 11/13 These predictions include up to 1.4 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
High Surf	**Impacts:** Large breaking waves up to 25 feet. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** Saturday through Monday (Next Weekend) **Confidence:** Moderate

High Surf	**Impacts:** Large breaking waves up to 25 feet. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** Saturday through Monday (Next Weekend) **Confidence:** Moderate
	Details: • Long period (14-16 seconds) west/northwesterly swell will result in dangerous surf conditions and localized beach erosion, especially at high tide • Inexperienced swimmers and boaters should stay out of the water • Increased risk for sneaker waves and strong rip currents with these large breakers
Rain	**Impacts:** Scattered light rain showers possible on Friday. Moderate rain arrives Saturday. **Timing:** Saturday through Sunday **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

East Bay	
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Through Friday 11/13 **Confidence:** High
	Details: At the San Francisco tide gauge, high tide is expected to be: • 1.5 ft above normal (7.3 ft MLLW) at 10:35 AM Monday 11/9 • 1.5 ft above normal (7.3 ft MLLW) at 11:04 AM Tuesday 11/10 • 1.4 ft above normal (7.2 ft MLLW) at 11:35 AM Wednesday 11/11 • 1.3 ft above normal (7.1 ft MLLW) at 12:10 PM Thursday 11/12 • 1.1 ft above normal (6.9 ft MLLW) at 12:49 PM Friday 11/13 These predictions include up to 1.4 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Rain	**Impacts:** Moderate rain showers arrive Saturday **Timing:** Saturday through Sunday **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

South Bay	
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Through Friday 11/13 **Confidence:** High
	Details: At the San Francisco tide gauge, high tide is expected to be: • 1.5 ft above normal (7.3 ft MLLW) at 10:35 AM Monday 11/9 • 1.5 ft above normal (7.3 ft MLLW) at 11:04 AM Tuesday 11/10 • 1.4 ft above normal (7.2 ft MLLW) at 11:35 AM Wednesday 11/11 • 1.3 ft above normal (7.1 ft MLLW) at 12:10 PM Thursday 11/12 • 1.1 ft above normal (6.9 ft MLLW) at 12:49 PM Friday 11/13 These predictions include up to 1.4 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Rain	**Impacts:** Moderate rain showers arrive Saturday **Timing:** Saturday through Sunday **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

Santa Cruz County	
Beach Hazards	**Impacts:** Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks **Timing:** ***First round:*** Through Monday. ***Second round:*** Thursday through Friday **Confidence:** Low to moderate due to the swell direction being 270°-300°
	Details: • Beach Hazards Statement in effect through 10 PM Monday • ***First round:*** Long period (14-18 second) west/northwesterly swell will bring an increased risk for sneaker waves and strong rip currents with breaking waves of 12 to 16 feet • ***Second round:*** Long period (14-16 second) west/northwesterly swell will bring an increased risk for sneaker waves and strong rip currents with breaking waves up to 20 feet • Reasonable best case scenario: Less impacts and smaller breaking waves will result if the swell direction is northwesterly rather than westerly
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Saturday through Tuesday **Confidence:** High
	Details: At the Monterey tide gauge, high tide is expected to be: • 1.5 ft above normal (6.8 ft MLLW) at 9:24 AM Monday 11/9 • 1.5 ft above normal (6.8 ft MLLW) at 9:52 AM Tuesday 11/10 These predictions include up to 1.6 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
High Surf	**Impacts:** Large breaking waves up to 25 feet. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** Saturday through Monday (Next Weekend) **Confidence:** Low to moderate due to the swell direction being 270°-300°
	Details: • Long period (14-16 seconds) west/northwesterly swell will result in dangerous surf conditions and localized beach erosion, especially at high tide • Inexperienced swimmers and boaters should stay out of the water • Increased risk for sneaker waves and strong rip currents with these large breakers • Reasonable best case scenario: Less impacts and small to moderate breaking waves will result if the swell direction is northwesterly rather than westerly
Rain	**Impacts:** Scattered light rain arrives Thursday through Friday. Moderate rain expected by Saturday. **Timing:** Thursday into the weekend **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

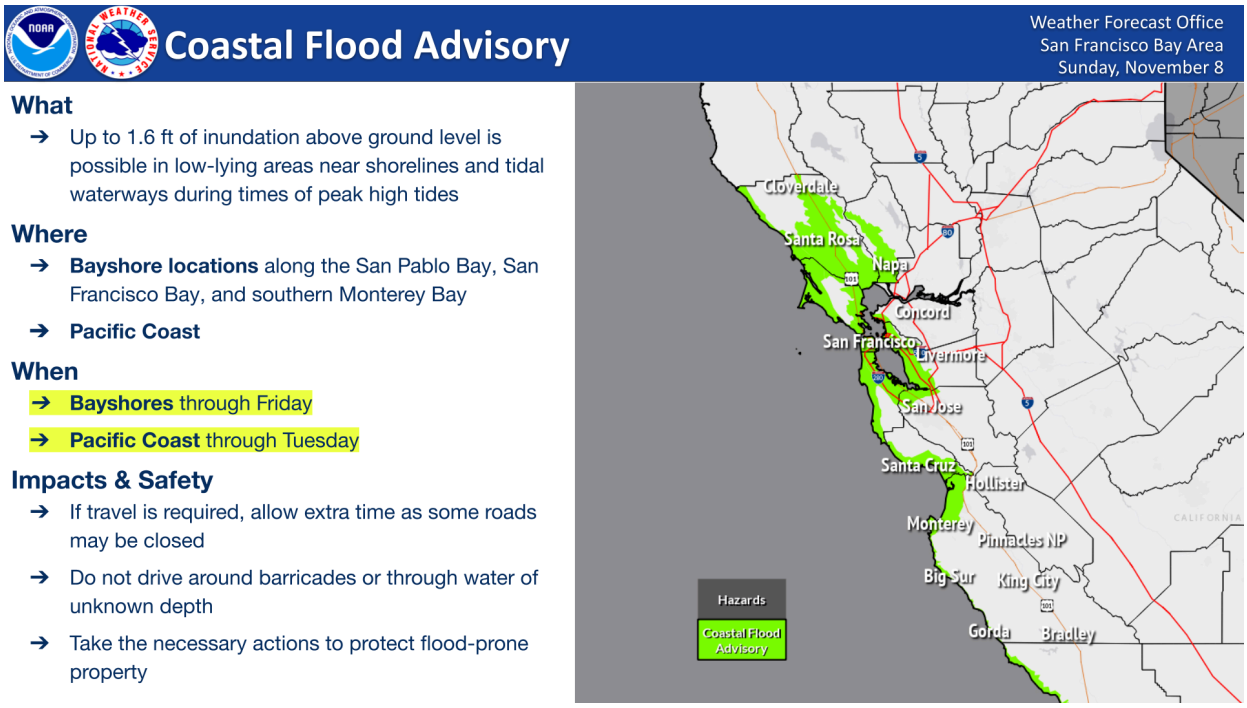

Monterey & San Benito County	
Beach Hazards	**Impacts:** Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks **Timing:** ***First round:*** Through Monday. ***Second round:*** Thursday through Friday **Confidence:** Moderate
	Details: • Beach Hazards Statement in effect through 10 PM Monday • ***First round:*** Long period (14-18 second) west/northwesterly swell will bring an increased risk for sneaker waves and strong rip currents with breaking waves of 12 to 16 feet • ***Second round:*** Long period (14-16 second) west/northwesterly swell will bring an increased risk for sneaker waves and strong rip currents with breaking waves up to 20 feet
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Through Friday 11/13 **Confidence:** High
	Details: At the Monterey tide gauge, high tide is expected to be: • 1.5 ft above normal (6.8 ft MLLW) at 9:24 AM Monday 11/9 • 1.5 ft above normal (6.8 ft MLLW) at 9:52 AM Tuesday 11/10 • 1.4 ft above normal (6.7 ft MLLW) at 10:23 AM Wednesday 11/11 • 1.3 ft above normal (6.6 ft MLLW) at 10:56 AM Thursday 11/12 • 1.1 ft above normal (6.4 ft MLLW) at 11:34 PM Friday 11/13 These predictions include up to 1.6 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
High Surf	**Impacts:** Large breaking waves up to 25 feet. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** Saturday through Monday (Next Weekend) **Confidence:** Moderate
	Details: • Long period (14-16 seconds) west/northwesterly swell will result in dangerous surf conditions and localized beach erosion, especially at high tide • Inexperienced swimmers and boaters should stay out of the water • Increased risk for sneaker waves and strong rip currents with these large breakers
Rain	**Impacts:** Scattered light rain arrives Thursday through Friday. Moderate rain expected by Saturday. **Timing:** Thursday into the weekend **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations
