Coastal Flooding continues, Beach Hazards Statement and High Surf Warning. Pattern change with wet weather late week to early next week

KEY POINTS

- **Seasonally warm and dry conditions continue into Thursday**
- **Wet weather returns to the region late Thursday into the early part of next week**
- **Coastal flooding due to high tides continues through Friday**
- **Hazardous beach conditions return this evening including dangerous high surf this weekend**

WEATHER RISK OUTLOOK

Risk levels incorporate potential impacts from weather hazards and likelihood of occurrence for a reasonable worst-case scenario.

	Wed 11/11	Thu 11/12	Fri 11/13	Sat 11/14	Sun 11/15	Mon 11/16	Tue 11/17

Risk Levels	Little to None	Minor	Moderate	Major	Extreme

DETAILS

North Bay	
High Surf	**Impacts:** Dangerously large breaking waves of 25 to 30 ft expected. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** High Surf Warning Friday evening to Sunday morning **Confidence:** Moderate
	Details: • Long period west/northwesterly swell will result in dangerous surf conditions and localized beach erosion, especially at high tide • Inexperienced swimmers and boaters should stay out of the water • Increased risk for sneaker waves and strong rip currents with these large breakers
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Through Friday (11/13) **Confidence:** High
	Details: At the San Francisco tide gauge, high tide is expected to be: • 1.4 ft above normal (7.2 ft MLLW) at 11:35 AM Wednesday 11/11 • 1.3 ft above normal (7.1 ft MLLW) at 12:10 PM Thursday 11/12 • 1.1 ft above normal (6.9 ft MLLW) at 12:49 PM Friday 11/13 These predictions include up to 1.4 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Wind	**Impacts:** Increasing southerly winds Friday with gusts to 35 mph, possibly higher gusts with cold front.
Beach Hazards	**Impacts:** Expect an increased risk for sneaker waves and strong rip currents with breaking waves of 15 to 20 ft. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** This evening to Friday evening **Confidence:** Moderate
Rain	**Impacts:** Rain late Thursday through Friday, showers Saturday, Rain Sunday into Monday **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

San Francisco	
High Surf	**Impacts:** Dangerously large breaking waves of 25 to 30 ft expected. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** High Surf Warning Friday evening to Sunday morning **Confidence:** Moderate
	Details: • Long period (14-16 seconds) west/northwesterly swell will result in dangerous surf conditions and localized beach erosion, especially at high tide • Inexperienced swimmers and boaters should stay out of the water • Increased risk for sneaker waves and strong rip currents with these large breakers
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Through Friday 11/13 **Confidence:** High
	Details: At the San Francisco tide gauge, high tide is expected to be: • 1.4 ft above normal (7.2 ft MLLW) at 11:35 AM Wednesday 11/11 • 1.3 ft above normal (7.1 ft MLLW) at 12:10 PM Thursday 11/12 • 1.1 ft above normal (6.9 ft MLLW) at 12:49 PM Friday 11/13 These predictions include up to 1.4 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Wind	**Impacts:** Increasing southerly winds Friday with gusts to 35 mph, possibly higher gusts with cold front.
Beach Hazards	**Impacts:** Expect an increased risk for sneaker waves and strong rip currents with breaking waves of 15 to 20 ft. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** This evening to Friday evening **Confidence:** Moderate
Rain	**Impacts:** Rain late Thursday through Friday, showers Saturday, Rain Sunday into Monday **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

SF Peninsula	
High Surf	**Impacts:** Dangerously large breaking waves of 25 to 30 ft expected. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** High Surf Warning Friday evening to Sunday morning **Confidence:** Moderate
	Details: • Long period (14-16 seconds) west/northwesterly swell will result in dangerous surf conditions and localized beach erosion, especially at high tide • Inexperienced swimmers and boaters should stay out of the water • Increased risk for sneaker waves and strong rip currents with these large breakers
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Through Friday 11/13 **Confidence:** High
	Details: At the San Francisco tide gauge, high tide is expected to be: • 1.4 ft above normal (7.2 ft MLLW) at 11:35 AM Wednesday 11/11 • 1.3 ft above normal (7.1 ft MLLW) at 12:10 PM Thursday 11/12 • 1.1 ft above normal (6.9 ft MLLW) at 12:49 PM Friday 11/13 These predictions include up to 1.4 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Wind	**Impacts:** Increasing southerly winds Friday with gusts to 35 mph, possibly higher gusts with cold front.
Beach Hazards	**Impacts:** Expect an increased risk for sneaker waves and strong rip currents with breaking waves of 15 to 20 ft. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** This evening to Friday evening **Confidence:** Moderate
Rain	**Impacts:** Rain late Thursday through Friday, showers Saturday, Rain Sunday into Monday **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

East Bay	
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Through Friday 11/13 **Confidence:** High
	Details: At the San Francisco tide gauge, high tide is expected to be: • 1.4 ft above normal (7.2 ft MLLW) at 11:35 AM Wednesday 11/11 • 1.3 ft above normal (7.1 ft MLLW) at 12:10 PM Thursday 11/12 • 1.1 ft above normal (6.9 ft MLLW) at 12:49 PM Friday 11/13 These predictions include up to 1.4 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Wind	**Impacts:** Increasing southerly winds Friday with gusts to 35 mph, possibly higher gusts with cold front.
Rain	**Impacts:** Rain late Thursday through Friday, showers Saturday, Rain Sunday into Monday **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

South Bay	
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Through Friday 11/13 **Confidence:** High
	Details: At the San Francisco tide gauge, high tide is expected to be: • 1.4 ft above normal (7.2 ft MLLW) at 11:35 AM Wednesday 11/11 • 1.3 ft above normal (7.1 ft MLLW) at 12:10 PM Thursday 11/12 • 1.1 ft above normal (6.9 ft MLLW) at 12:49 PM Friday 11/13 These predictions include up to 1.4 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Wind	**Impacts:** Increasing southerly winds Friday with gusts to 35 mph, possibly higher gusts with cold front.
Rain	**Impacts:** Rain late Thursday through Friday, showers Saturday, Rain Sunday into Monday **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

Santa Cruz County	
High Surf	**Impacts:** Dangerously large breaking waves of 25 to 30 ft expected. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** High Surf Warning Friday evening to Sunday morning **Confidence:** Low to moderate due to the swell direction being 270°-300°
	Details: • Long period (14-16 seconds) west/northwesterly swell will result in dangerous surf conditions and localized beach erosion, especially at high tide • Inexperienced swimmers and boaters should stay out of the water • Increased risk for sneaker waves and strong rip currents with these large breakers • Reasonable best case scenario: Less impacts and small to moderate breaking waves will result if the swell direction is northwesterly rather than westerly
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Saturday through Tuesday **Confidence:** High
	Details: At the Monterey tide gauge, high tide is expected to be: • 1.5 ft above normal (6.8 ft MLLW) at 9:52 AM Tuesday 11/10 These predictions include up to 1.6 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Wind	**Impacts:** Increasing southerly winds Friday with gusts to 35 mph, possibly higher gusts with cold front.
Beach Hazards	**Impacts:** Expect an increased risk for sneaker waves and strong rip currents with breaking waves of 15 to 20 ft. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** This evening to Friday evening
Rain	**Impacts:** Rain late Thursday through Friday, showers Saturday, Rain Sunday into Monday **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

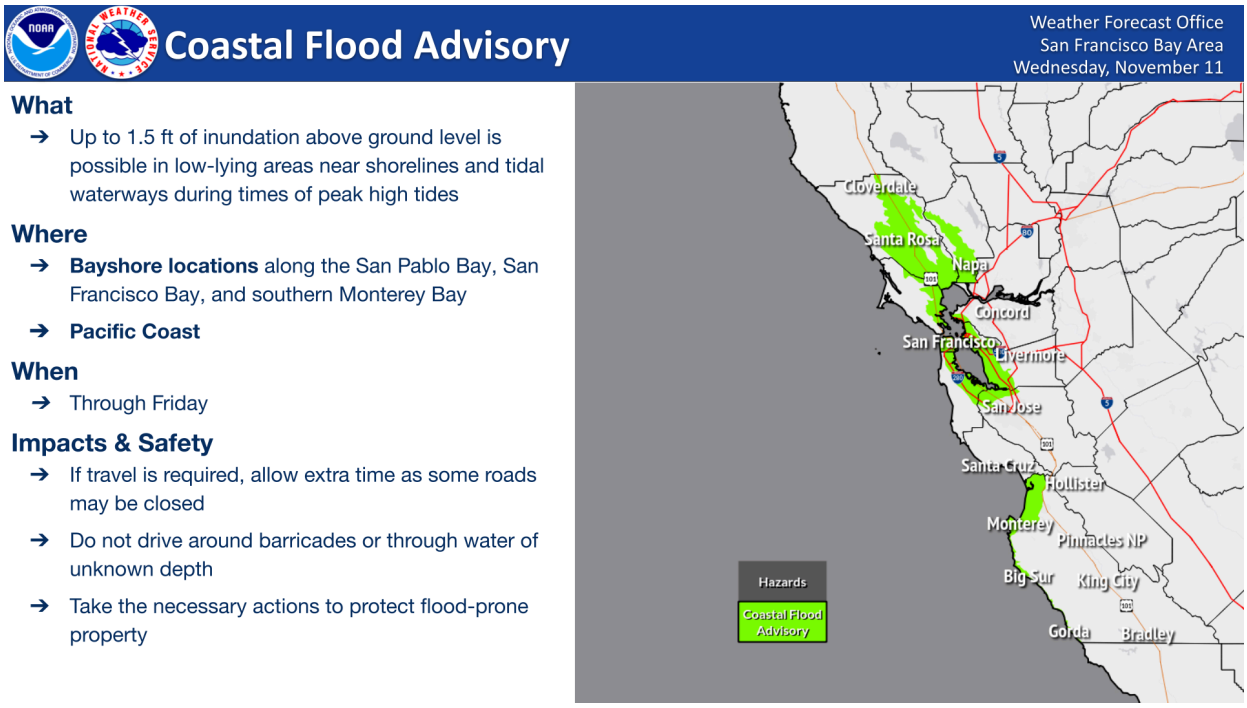

Monterey & San Benito County	
High Surf	**Impacts:** Dangerously large breaking waves of 25 to 30 ft expected. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** High Surf Warning Friday evening to Sunday morning **Confidence:** Moderate
	Details: • Long period (14-16 seconds) west/northwesterly swell will result in dangerous surf conditions and localized beach erosion, especially at high tide • Inexperienced swimmers and boaters should stay out of the water • Increased risk for sneaker waves and strong rip currents with these large breakers
Coastal Flooding	**Impacts:** High tides will result in flooding of low-lying infrastructure, isolated road closures, and coastal erosion. Rising tides will bring water and waves farther up the beach than normal, restricting escape from beaches and coastal areas. **Timing:** Through Friday 11/13 **Confidence:** High
	Details: At the Monterey tide gauge, high tide is expected to be: • 1.4 ft above normal (6.7 ft MLLW) at 10:23 AM Wednesday 11/11 • 1.3 ft above normal (6.6 ft MLLW) at 10:56 AM Thursday 11/12 • 1.1 ft above normal (6.4 ft MLLW) at 11:34 PM Friday 11/13 These predictions include up to 1.6 ft of surge that will enhance the astronomical tide and flooding threat. High tide varies up to 90 minutes earlier or later along the Pacific Coast and through the San Francisco Bay, respectively.
Wind	**Impacts:** Increasing southerly winds Friday with gusts to 35 mph, possibly higher gusts with cold front.
Beach Hazards	**Impacts:** Expect an increased risk for sneaker waves and strong rip currents with breaking waves of 15 to 20 ft. Waves can sweep across the shoreline without warning, pulling people into the sea from beaches, jetties, and rocks. **Timing:** This evening to Friday evening **Confidence:** Moderate
Rain	**Impacts:** Rain late Thursday through Friday, showers Saturday, Rain Sunday into Monday **Confidence:** Moderate
	Details: • Wet roadways will result in slick driving conditions • Nuisance flooding is possible in creeks, small streams, as well as other low-lying, poor drainage, urban, and flood-prone locations

High Surf Warning

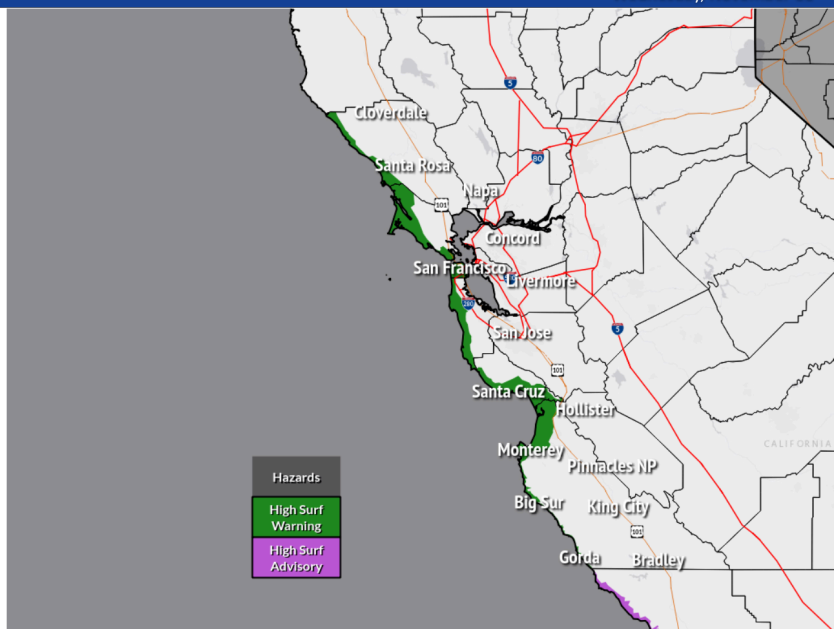

Weather Forecast Office
San Francisco Bay Area
Wednesday, November 11

What
- Dangerously large breaking waves of 25 to 30 feet

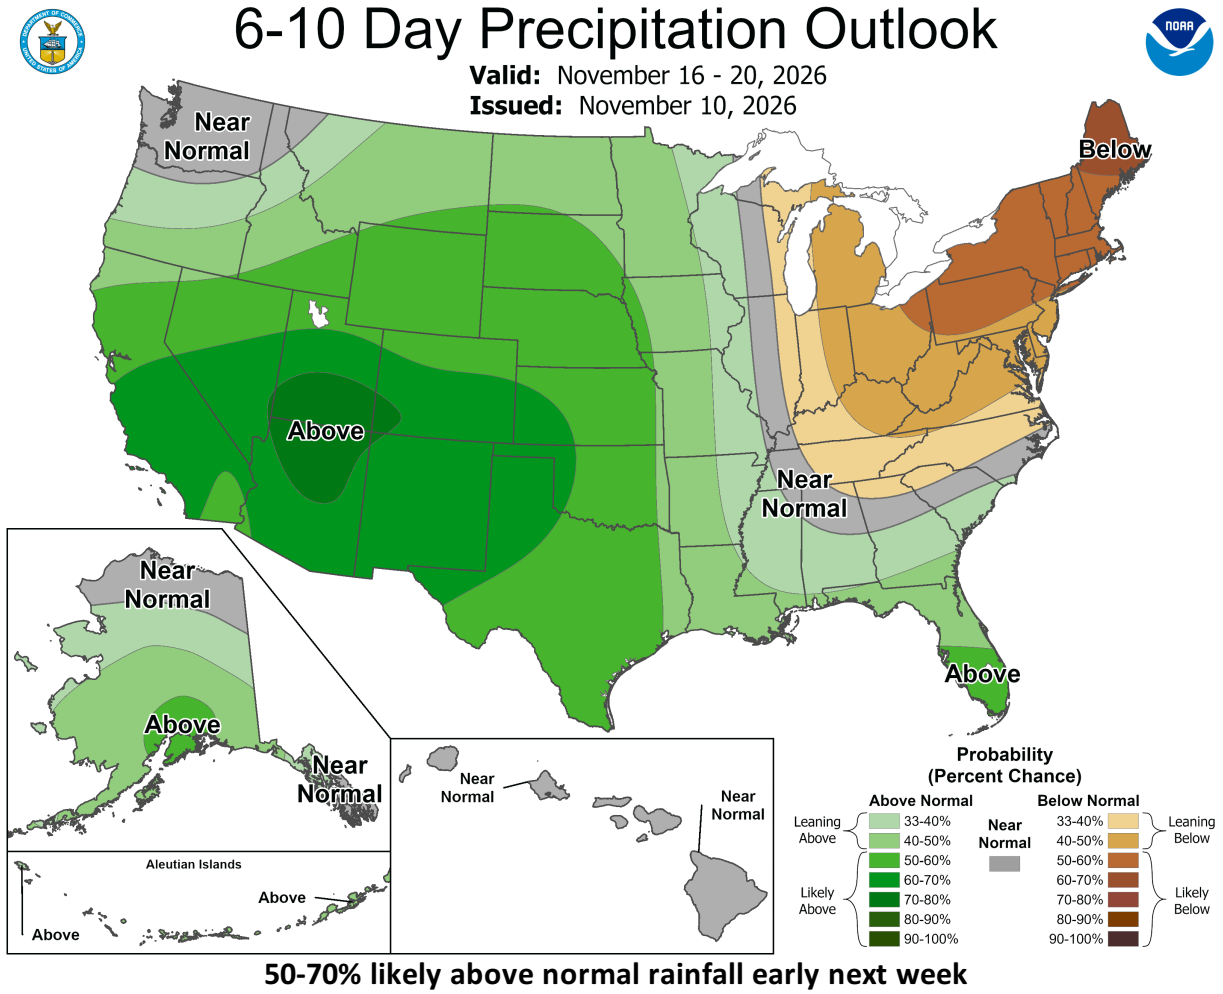

Where
- Pacific Coast beaches

When
- 6 PM Friday through 4 AM Sunday

Impacts & Safety
- Dangerously large breaking waves can overpower swimmers, pulling people into the sea from beaches, jetties, and rocks resulting in serious physical injury and increasing the risk of drowning
- Remain out of the water to avoid hazardous surf
- Never turn your back on the ocean!

Current WeatherStory (3).png

50-70% likely above normal rainfall early next week
